

ANDERSON'S COLLEGE MEDICAL SCHOOL,
SECRETARY'S CHAMBERS,
50 WEST REGENT STREET,
GLASGOW, 24th August, 1900.

SAMSON GEMMELL, ESQ., M.D., F.F.P.S.,
17 WOODSIDE PLACE, GLASGOW.

DEAR DR. GEMMELL,

Referring to your application for the Chair of Clinical Medicine in the University of Glasgow, the Governors desire at this time to express to you their appreciation of the excellent work done by you at the School since you were appointed to the Chair of Practice of Medicine in 1880. From the first your class has been well attended by students not only of the School itself but of other schools of medicine. On referring to your Class Reports for recent years, the Governors note that the number of your students has varied from 83 to 125, the number last year being 113. That you have attracted so large a number of students to a class in an extra-mural school is of itself strong testimony to your capacity as a teacher, and, in the opinion of the Governors, would afford good ground for anticipating for you even greater success within the walls of the University, if the Chair for which you are now applying were conferred upon you.

The Governors believe that your appointment to the Chair of Clinical Medicine would strengthen the name of the University as a teaching centre, and would be to the best interests of the students, combining as you do an intimate and practical knowledge of the subject with the gift of imparting your knowledge to others.

The Governors would naturally regret to lose so able a member of their Teaching Staff, but they wish you success in your candidature, and they would have every confidence in asking the Members of the University Court to give your application their most favourable consideration.

If you think that this letter would be of any service to you in your candidature, you are at liberty to make such use of it as you may think right. It is addressed to you in terms of instructions given by the Governors at a meeting specially called to consider what steps should be taken by the Board in connection with your application, and it is signed by us on their behalf.

Yours very truly,

A. MALLOCH BAYNE, *President.*
CHAS. M. KING, *Vice-President.*
J. B. KIDSTON, *Secretary.*

C

ANDERSON'S COLLEGE MEDICAL SCHOOL,
GLASGOW, 30th August, 1900.

DEAR PROFESSOR GEMMELL,

We, the undersigned members of the Faculty of Anderson's College Medical School, having heard of your intention to apply for the Chair of Clinical Medicine in the University of Glasgow, feel that it is our duty to express our high opinion of your work, and the great esteem in which we hold you as a colleague.

For twenty years you have held the Chair of Practice of Medicine in this College, with the best possible results to the success of the School. The popularity of your class, especially among University students, is well known, and we feel that whatever loss Anderson's College may sustain, the University will gain much by your appointment.

Your success as a teacher of Practice of Medicine has gone hand in hand with your success as a teacher in Clinical Medicine. It is a matter of common knowledge to all who take an interest in the progress of the Glasgow School that your reputation has been as great in the one as in the other.

Ever since your graduation you have been closely associated at one time or other with all the important Hospitals of the City, and throughout this period you have taken the deepest interest in all that pertains to the study and advancement of the science of Clinical Medicine.

In the Royal Infirmary, and during the last eight years in the Western Infirmary, you have had special facilities for the study and teaching of the subject, and we know that in these Institutions you have attracted large numbers of students to your wards.

It is unnecessary to refer to your very wide knowledge of general and medical literature, or enumerate the important communications which you have yourself made to the profession.

We feel that if the University Court see fit to appoint you to the Chair of Clinical Medicine in the University they will add to their Professoriate one of great power and resource.

- T. KENNEDY DALZIEL, M.B.,
Professor of Surgery.
- A. M. BUCHANAN, A.M., M.D.,
Professor of Anatomy.
- J. ROBERTSON WATSON, M.A.,
Professor of Chemistry.
- R. BARCLAY NESS, M.A., M.B.,
Professor of Materia Medica and Therapeutics.
- W. ERNEST THOMSON, M.A., M.D.,
Professor of Physiology.
- JOHN EDGAR, M.A., M.B., B.Sc.,
Professor of Midwifery.
- CARSTAIRS DOUGLAS, B.Sc., M.D.,
Professor of Medical Jurisprudence.
- B. G. CORMACK, M.A., B.Sc.,
Professor of Botany.
- PETER BENNETT,
Professor of Physics.
- JOHN MACINTYRE, M.B., F.R.S.E., F.R.M.S.,
Lecturer on Diseases of Throat and Nose.
- J. GALBRAITH CONNAL, M.B.,
Lecturer on Aural Surgery.
- T. SPENCE MEIGHAN, M.B.,
Lecturer on Ophthalmic Medicine and Surgery.
- JOHN CARSWELL, L.R.C.P.E., L.F.P.S.G.,
Lecturer on Mental Diseases.

*CHAIR OF CLINICAL MEDICINE
GLASGOW UNIVERSITY.*

LETTERS FROM THE GOVERNORS AND
MEDICAL FACULTY OF ANDERSON'S
COLLEGE MEDICAL SCHOOL

RELATIVE TO THE

APPLICATION

OF

SAMSON GEMMELL, M.D.

TO THE MEMBERS OF
THE GLASGOW UNIVERSITY COURT.

MY LORD RECTOR, MR. PRINCIPAL, AND GENTLEMEN,

In view of the vacancy in the Chair of Clinical Medicine, I beg leave to offer myself as a candidate for the appointment.

I am 59 years of age. In 1867 I graduated "with honours" in Medicine in the University of Glasgow, and last year the University conferred on me the honorary degree of Doctor of Laws. I was admitted a Fellow of the Faculty of Physicians and Surgeons of Glasgow in 1871; I have held the office of Honorary Librarian in that body for 24 years, and since November last have also occupied the position of Visitor of the Faculty, an office which corresponds to that of Vice-President in similar institutions elsewhere.

From the period of my entering the Medical Profession I have been engaged almost continuously in hospital work, and since 1871 in clinical teaching. At first, I worked in the Clinical Hospital, Manchester; from 1871 to 1874 I assisted Sir William Gairdner in his Clinique at the Glasgow Royal Infirmary; and since February, 1875, I have been a Physician to the Glasgow Western Infirmary, and, as a recognised lecturer on the subject, have taught Clinical Medicine there ever since.

Having held the office of Physician to the Royal Hospital for Sick Children from its opening in 1883 till my resignation in November, 1898, I had, in that institution also, a certain amount of clinical teaching. On resigning, I was elected Consulting Physician.

The subject of the vacant Chair being Medicine as taught at the bedside it may be relevant to mention that soon after my appointment to the Glasgow Western Infirmary I published a *Clinical Manual for the Study of Medical Cases*; the first edition appeared in London in 1878, the second in 1886, and the third in 1891. Two large editions of this work have also been published in the United States. I have reason to know that it has been extensively used in the medical schools of this country, in the United States, and in the Colonies.

When the *Cycloœdia of the Diseases of Children*, in four large octavo volumes, was projected in America, I was requested to write the chapter on "Diagnosis," which appeared in 1889.

I append a list of my principal memoirs, papers, and communications to the Medical Press. The list is not exhaustive, and particularly it is exclusive of a number of contributions in which my assistants and pupils have, with my sanction, availed themselves of the clinical cases under my care. My papers have appeared in various periodicals in this country and in the United States; a few have been published in Continental journals. In the accompanying list, I have classified my contributions into three groups: the first, and much the largest, is in the department of Clinical Medicine.

Having been for so many years a physician and clinical teacher in the hospital in which the duties of the chair will fall to be discharged, working all that time under the eye of the University, and personally known to most of the members of the Court, it has seemed to me that the judgment of the Court would not be materially aided by the production of outside testimony in my favour. No doubt, if desired, this could be easily obtained; but for the reasons stated, I have not troubled my friends to give it.

The fact that the duties of the Chair are almost identical with those I have so long performed in the Western Infirmary, enables me now to submit my application with the greater confidence.

I have the honour to be,

Your obedient Servant,

JAMES FINLAYSON.

2 WOODSIDE PLACE,

CHAIR OF
CLINICAL MEDICINE.

APPLICATION

BY

JAMES FINLAYSON,
M.D., LL.D.(GLASG.).

Physician and Lecturer on Clinical Medicine, Glasgow Western Infirmary; Visitor and Honorary Librarian, Faculty of Physicians and Surgeons, Glasgow; Consulting Physician to the Royal Hospital for Sick Children, Glasgow; late President of the Glasgow Pathological and Clinical Society, etc.
